

Dear FCC:

Your recent inclusion of all association faxes as banned, unless written permission is received from our members/clients, will be extremely disruptive on day to day business practices. If a relationship is established with a member/client it should be our decision, whether or not they should receive a fax. Believe me, we don't want to frustrate our customers with unwanted faxes!!! In all faxes that are sent from our association, the receiver has the opportunity to opt out of receiving future faxes. However, most appreciate the update/information we are providing in the fax. Also, what constitutes commercial? Please reconsider this law. Don't hurt the masses for the sake of the few.
